

INSPIRING KNOWLEDGE EDUCATION SOFTWARE

ABSOLUTE[®]

ABSOLUTE

*Firmware-embedded protection for devices,
data and security controls*

There has never been a more critical need for an undeletable endpoint defense platform. With Absolute, you can manage and secure your data, devices, and applications with an unbreakable connection to every endpoint — on or off your network.

Once activated, it never loses sight or control of any device.*

*All devices are Absolute ready. Absolute solution must be activated with the purchase of a license subscription.

- Get immediate visibility of where every student device is located — and what's on it
- Ensure security and compliance don't fall behind
- Save your IT teams hours of homework

Main features:

Embedded & Self-Healing The only platform powered by self-healing technology embedded in our device's firmware

Encryption & Anti-Malware Monitoring Flag devices where encryption or anti-malware is disabled, and restore security controls with zero human touch

Software Analytics Detect changes to applications, while capturing unauthorized software on any device

Geofencing Put a ring around your data and devices to enforce physical boundaries in this post perimeter era

Device Utilization Understand which devices are inactive, and where reallocation needs to occur

Hardware Analytics Discover every endpoint and benchmark devices against security policies and regulatory standards

ikES powered by jp.ik
