

Canva can also be accessed by students for tasks. It allows for image editing and project-based learning using a simple drag-and-drop interface that works well even for younger students. They can also work as a team by viewing, editing, and submitting comments in real time, wherever they are. From brainstorming as a group working collaboratively to individual project creation, it has lots of potential uses in the classroom.

- Helps teachers create engaging lesson materials
- Enables project-based learning
- Promotes collaboration among students
