MUSIC

World Of Music

Classplash's World of Music is a series about music education where you'll learn all about melody, rhythm, music theory and other wonderful things related with music.

Our music learning games listen to you while you play and provide immediate feedback – making learning an instrument fun!

Music education has a lot of development benefits! It helps to promote self-confidence by reducing fear of failure through activation of brain neurons. It also improves the social behavior and personality development while simulates a deeper logical-mathematical understanding.

- Fun and engaging
- No music reading skills necessary
- Developed by award-winning music educators

World of Music includes the following modules:

Baby Composer a simple and engaging game designed to help children learn the basics of a musical notation while composing small melodies;

Rhythmic Village learn how to play the drums and read sheet music:

Flute Master learn to play a real instrument;

Harmony City learn to play chords on the guitar or ukulele;

Cornelius Composer teachers and students can easily compose music without complex and difficult-to-use special software;

Hello Music! an interactive and colorful game which can be played with real instruments and introduces children to the most common notes in music.
